

ADT SERIES SELF CONTAINED ECONOMY DUST

Made in the USA

Efficient, compact design for continuous operation handles a wide range of dust applications from 1000 to 6000 cfm.

- Self-contained up flow system with vertically positioned filters which eliminates particulate re-entrainment and improves filter life.
- Venturi assist design optimizes reverse jet pulse cleaning, improves contaminant release and filter life.
- Cartridge filter efficiency 99.5% @ 0.5 microns.
- Filter cartridge options are available to suit specific operating conditions. These include fire retardant or washable spun board filters. Please contact us to make this selection.

**Excellent Choice for
continuous airflow.**
