

PRE-COAT FEEDER

15 CUBIC FEED PRE-COAT FEEDER
Made in the USA

Pre-Coat Feeder designed for dust collectors.

- 110 gallons / 15 cubic feet of Pre-Coat.
- Optional Extension Available for Larger Capacity.
- Unit uses a screw feeder design with a 15 cu. ft. Hopper.
- Feeder is adjustable for each application.
- Hopper will have a hinged lid with EZ Clamps.
- Hopper will have an intermittent pulse system on a timer for preventing bridging.
- Unit will use an AC Gear motor on a timer that will be adjustable for controlling pre-coat delivery.
- Unit will need to be connected to a normally open contact on the starter motor for the blower so when the blower is energized the contact closes and starts the Pre-Coat Machine.
- Unit will operate on 1/60/115V.
- Unit will be powder coated.

Excellent Choice for

- Dust collectors, increases filter life.
